

Populating filter parameters from a query string (URL)

Product

List Filter Plus - Version 4.3.xx

Question

What are the the list filter web part query string parameters?

Answer

You can populate the filter parameters from a query string (URL)The URL

sample is (Link: <http://SERVER/Filter/default.aspx?filterfield1=Status&filtervalue1=1;2;3>)

<http://portal.kwizcom.com/Filter/default.aspx?filterfield1=Status&filtervalue1=1;2;3>

Where:

filterfield1(2,3...) is field internal name – case sensitive

filtervalue1(2,3...) is filter value delimited by character `;`
