

## Question

While using Repeating Rows, If one of the columns is a multi line text field, how can we wrap it, so it doesn't distort the form size?

## Answer

To be able to fix this issue, you will need to follow the steps below:

1. On your site, please go to the "site assets" library.
2. Please search for the KWIZCOM > APLFE sub-folder.
3. In this folder, please search for the kwizcom.aplfe.controller.css file. Edit it, and add the following style:

```
.k-rrfieldcontainer {  
    white-space: normal !important;  
}
```
