

Summary

This article outlines how to customize Wiki Plus Template for new Wiki Plus libraries

Example: Is it possible to include a webpart in a wiki plus template to show the note board web part on every page and would have to add it several times if we edit every page?

Product& Version

KWizCom Wiki Plus Standard Evaluation 2.x.xx for SharePoint 2007

KWizCom Wiki Plus Standard Evaluation 12.x.xx for SharePoint 2010

Resolution

For managing layouts and customizing the WikiPlus solution KWizCom: Please use the Customization Guide:

http://www.kwizcom.com/objects/WikiPlus/v2.1.50/kwizcom_sharepoint_wikiplus_customization_guide.pdf

The default WikiPlus templates are "wkptmpl.aspx", "wkptmpl_site.aspx" which located into "C:\Program Files\Common Files\Microsoft Shared\Web Server Extensions\14\TEMPLATE\LAYOUTS\KWizCom_WikiPlus\WPlibFiles" folder. Once any WikiPlus site or library created the files uploaded to the "Forms" folder inside created WikiPlus library and used for new pages creating. The "wkptmpl.aspx" file is using for creating a new WikiPlus page. The "wkptmpl_site.aspx" file is using for creating a home page in a new create WikiPlus site.

a. To change page layout in an existed WikiPlus library: You need to use SharePoint designer to go to the library and modify "wkptmpl.aspx" file inside Forms folder.

b. To change page layout for a new WikiPlus libraries.: You need to go to "C:\Program Files\Common Files\Microsoft Shared\Web Server Extensions\14\TEMPLATE\LAYOUTS\KWizCom_WikiPlus\WPlibFiles" folder and customize "wkptmpl.aspx", "wkptmpl_site.aspx" files. The files will be replaced if you upgrade to a new version of WikiPlus. Make sure that you have copy of the files in order to put them back after upgrade.
